

eluminocity GmbH, Karlstraße 96, 80335 München

Press Release
August 25, 2016

The eluminocity GmbH continues to grow and relocates to a new building.

MUNICH. The eluminocity GmbH, based in Munich, enlarges its office space in order to keep pace with continued growth. The company relocates to recently renovated office spaces in the Karlstrasse 96, not far from the former corporate headquarters in the Schellingstrasse. The relocation became necessary, since the existing facilities reached their capacity limits.

“eluminocity developed very positive over the two years since foundation. In recent months we have built up our team with well-qualified staff and deliberately expanded our expertise to meet the rising demand. That’s why we moved to the new spacious rooms, offering commodious office space, conference rooms and lounges.”

New address:

Karlstrasse 96
D-80335 Munich

There will be no change to the former contact data.

eluminocity developed in cooperation with the BMW Group the modular product system “Light & Charge” to transform street lights into charging stations for electric vehicles. The system retrofits street lights with highly efficient LED lighting combined with an integrated EV charging solution in a fully connected environment. Furthermore, the new product expansion enables companies to offer modern services to their customers, guests or employees through providing electric charging possibilities. “Light & Charge” is already installed in several major cities such as Munich, Chicago, Eindhoven or Starnberg.
