

eluminocity GmbH, Karlstrasse 96, 80335 Munich

Press Release
November 21, 2016

eluminocity und Invention2Go agree on close cooperation.

MUNICH. The eluminocity GmbH and Invention2Go GmbH - two of the leading German supplier of solutions for electric mobility - sign an agreement for close collaboration. The eluminocity products will be combined with the consulting and service offering of its partner company Invention2Go. Thus, the offering becomes a complete solution package for cities and municipalities, industrial and commercial business enterprises, the hotel and catering sector, car park operators and car dealers. Invention2Go will distribute the eluminocity charging stations in the future. In return, eluminocity will integrate the consulting services of Invention2Go into its product portfolio.

Sebastian Jagsch, CEO of eluminocity, says: "Both companies possess innovative, attractive and complementary solution sets. We can cope with the sharp rise in demand by stepping up this cooperation. By combining sales and services we can meet that demand and operate jointly on the market."

Sascha Mattes, Managing Partner of Invention2Go adds that "the charging stations of eluminocity feature a large number of model diversity and are characterized by their outstanding design. The eluminocity products are thus brilliantly applicable to all of our target markets."

Invention2Go is an e-Mobility Provider and offers complete, comprehensive services and consulting for e-Mobility, which includes planning and implementation of an intelligent infrastructure with connected charging stations. Invention2Go links the charging systems with the know-how being relevant for the operation of charging stations, customer management and the accounting of the charged electricity. Invention2Go offers the service of managing customers and contracts based on customized charging models. Access to nationwide suppliers and roaming providers is also possible.

eluminocity developed in cooperation with the BMW Group the modular product system "Light & Charge" to transform street lights into charging stations for

electric vehicles. The innovations of the eluminocity portfolio are essential elements of an intelligent infrastructure - for applications in the city and for every modern company. The eluminocity products are preferred choices in the public and semi-public space. Especially the Charging-Module serves as a modern and environmentally-friendly service and is implemented into the urban infrastructure as well as installed on customer and employee parking lots of industrial and commercial buildings and the hotel sector. The LED-Module helps in reducing energy costs and improving safety in the city and on parking areas. The Connect-Module supports, among other things, the intelligent lighting control, the car-park management and the analysis of environmental factors.
