

eluminocity GmbH, Karlstrasse 96, 80335 Munich

**Press Release**  
**January 31, 2017**

## **eluminocity GmbH and SEDLBAUER AG publish new sales cooperation.**

MUNICH. Sales network expanded: eluminocity GmbH, located in Munich, entered a sales partnership with SEDLBAUER AG, which is headquartered in the Bavarian city of Grafenau. This cooperation aims at fostering the market penetration in this region where SEDLBAUER is very active with additional sales activities. eluminocity can especially rely on the long-term experiences of SEDLBAUER in the field of e-mobility.

“SEDLBAUER’s years of experience and understanding of customer needs within the B2B field combined with the innovative products of eluminocity are the perfect combination to enhance e-mobility.”, explains Sebastian Jagsch, CEO and founder of eluminocity GmbH.

CEO of SEDLBAUER AG, Dipl.-Ing. Maximilian Halser adds: “The innovative charging stations of eluminocity fit perfectly in our product portfolio in the field of e-mobility. Since we are well-positioned in this market with our own developments, both companies profit from this expandable cooperation.”

**eluminocity** developed in cooperation with the BMW Group the modular product system “Light & Charge” to transform street lights into charging stations for electric vehicles. The innovations of the eluminocity portfolio are essential elements of an intelligent infrastructure - for applications in the city and for every modern company. The eluminocity products are preferred choices in the public and semi-public space. Especially the Charging-Module serves as a modern and environmentally-friendly service and is implemented into the urban infrastructure as well as installed on customer and employee parking lots of industrial and commercial buildings and the hotel sector. The LED-Module helps in reducing energy costs and improving safety in the city and on parking areas.

The Connect-Module supports, among other things, the intelligent lighting control, the car-park management and the analysis of environmental factors.

**SEDLBAUER AG** a company of the EDEWANZ Group, offers design, development and production of electro mechanical modules, charging stations and wallboxes, POS- and kiosk systems, transformers, energy supply and inductive components. The company serves customers in the market segment e-mobility, medical technology sector, industry electronics, electro engineering and railway technology.

The SEDLBAUER AG is a leading supplier of customer-specific system solutions and system integration. For more information [www.sedlbauer.de](http://www.sedlbauer.de).
