eluminocity GmbH, Karlstraße 96, 80335 München

Press release
17th of July 2018

eluminocity charging stations in the new competence centre for e-mobility

The "Car Dealership of the Future" has now opened in Freiburg (Breisgau) and eluminocity is part of it. The smart charging stations for electric cars and energy-saving LED street lamps from eluminocity characterize the outdoor area of the new Märtin car dealership. The urban product design blends perfectly into the futuristic architecture of the building.

Inside the building, the focus on alternative powertrains, sustainability and future viability quickly becomes clear. In addition to the BMW and BMW M brand worlds, the focus will be on BMWi products in particular. The Märtin car dealership also attaches great importance to customer-oriented and competent advice on all aspects of electric mobility and future mobility concepts.

More than 80 outdoor luminaires and six Light & Charge systems were installed. The charging stations for electric cars guarantee a smooth charging process for every electric car user thanks to intuitive user guidance.

eluminocity GmbH is pleased about the installations at another BMW dealer. Only together a shift to e-mobility is possible.

eluminocity offers high-quality charging stations for electric cars, intelligent street lighting and smart city sensors. Following the successful completion of the first round of financing and the entry of Trilux and innogy SE as shareholders, the young company based in Munich and Denver plans to extend their offering within the Smart City market. With the new capital, eluminocity will continue to drive technological development and internationalize their distribution network beyond Europe and the United States. Since 2014, the now 35-strong team has built up a comprehensive portfolio of freestanding, elegant EV charging stations as well as sensor solutions for needs-based street lighting. eluminocity has installed successful projects in Seattle, Munich and Hong Kong.
